

Dear Fellow Bike, Quad and off Road Enthusiasts

One of the NLSQBC club key aims is the set up and provision of a centre of excellence for off road motorcycling in North Lanarkshire. To this end we have created an online petition seeking the general support of all residents in Scotland to call upon the First Minister and the Scottish Executive to urgently review the current Planning and Environmental Regulations. These regulations are currently too restrictive in allowing for the provision of national and local facilities from being established throughout Scotland.

Please support this petition to the First Minister, to call upon him to identify the urgent need for establishing proper off-road facilities in Scotland.

This would allow young people to develop new skills with health benefits and promote responsible citizenship through participation at safe facilities which are regulated and to also remove the issue of criminalisation of young people for having a hobby. There are real positive benefits in developing young peoples skills and community responsibility as well as an opportunity to reduce perceived nuisance in our local communities from the use of off road motorcycles and quads.

Our intention is to create a high impact and intensive public campaign. Your support would be greatly appreciated, in addition the support of family, friends, motorcycle clubs and the wider community would help send a clear message to the Executive.

Thank you in advance.
